12-HOUR FLIGHT GERMAN HOPE

ried on in Unexplored Air Regions

By Cable from Monitor Bureau BERLIN (Via Mail to London) March 11-An association of German natural scientists and aviators has just been formed in Berlin to investigate, by means of airplane flights, conditions prevailing in the "stratosphere," as yet the almost unexplored air regions, 35,000 feet upward above the earth's surface. The organization is regarded in German aviation circles as the first serious step toward the establishment of an express air mail service between Hamburg and New York, along a torm-free route at an average altirude of about one mile higher than

he top of Mount Everest.

The pilot will be provided with upply of oxygen and inclosed in a pecially constructed pneumatic box. OPENS BIG FIELD Specially constructed pheumatic box. The Christian Science Monitor is informed that the association has an abundance of means and is in close touch with the foremost meteorolothat the Swedish firmness to refuse all claims to fresh seats on the Country and Country a stitute is now collaborating in the equipment of a flying laboratory and bservatory which is to be sent up in charge of expert aviators, to obtain all possible information concerning the higher atmosphere.

TELEPHONE RATE RISE IS HALTED **TEMPORARILY**

Court Rules Action Must Wait on Decision of the State Commission

Special from Monitor Bureau NEW YORK, March 11-The move by the New York Telephone Comfrom 10 to 35 per cent on telephone bills in New York City and 10 bills in New York City and 18 per cent up state, has been halted, at least temporarily, by the federal statutory court, composed of Judges Augustus N. Hand, Henry W. Rogers and Martin F. Manton. The court has handed down a decision that the motion by the company is nied, pending action by the New York State Public Service Commission the company's plea for a rate increase, which is now before the com-

mission. The opinion, written by Judge Rogers, reviewed the proceedings that have been carried on before the Public Service Commission and in the federal courts from October, 1920, to the present time, during which period the telephone company has sought additional rates for service to subscribers.

Got an Increase in 1921

In 1921 the company was granted an increase of approximately 20 per cent by the Public Service Commission over the rates then prevailing and in January, 1923, the commission scheduled for interurban service but pensions. With them were joined the granted an order permitting a further increase of 5 per cent. In August, 1924. Judge John C. Knox of the Federal Court permitted the company 10 per cent and enjoined the Public Service Commission and the Attor-ney-General from preventing the collection of such surcharges.

In the proceedings before the \$1,000,000. Statutory Court the company held that present reproduction costs, less additional rates asked for.

been engaged in legislative activity for old age pensions, criticized both Frank H. Hardison, who has presided over several commissions investigating pensions over a long period of years, and Allyn A. Young, professor of economics at Harvard University.

\$1 a Day Support

Robbins spoke for majority of the commission and explained their plan. Under its provisions, all aged poor over 70 years ceive compensation from the State to bring their total income up to \$1. He outlined the need for the measure, and told of the extensive investigation carried on by the com mission, which revealed that more than 20 per cent of the persons in the Commonwealth over 70 years of

age have no income of their own. To finance the non-contributor; system planned by the majority, which would cost \$5,500,000 the first year, and somewhat more in succeeding years, it is proposed to levy a poll tax on men and women of \$2, annually, and to increase the income tax ½ per cent. The practicability of these taxes was discussed by Mr. Robbins, and he contended that if bonus to war veterans, it is equally to pay a bonus to the veterans of

industry in the same way Europe's Experience Cited

From the beginning the conditions laid down by American members of the plebiscite commission have met with stubborn resistance, now on the have been many open threats and some physical clashes between parti-

Tension Has Increased

With the return home of former residents to participate in the election, tension has increased, and WASHINGTON, March 11 (AP)-The every report from South America attempt of Washington to settle the has indicated that the American representatives are finding their position more and more difficult.

In some South American circles, at least, the opinion is held that a Coolidge, as arbiter between Chile plebiscite is possible, and under the and Peru, decided to stake the sov- cover of diplomatic secrecy several informal but earnest efforts have been made to find some other solution. What part the State Department may have had in these discussions remains undisclosed.
Confronted with published stories

that they had formally suggested an alternate solution to the two interested nations, and had been rebuffed by Chile, department officials sealed their lips even tighter. They likewise have refused to com-

cles, telling how an attempt was school so as to give more attention made recently to induce disinterested to engineering economics and busi-South American nations to interness administration. That is being vene. Such a step, if successful, done by Harva: 1 and other Amer-would have extricated the Washington Government from at least a part sidered as a possible move by McGill of its embarrassments, but the ex- University, provided it meets with tent to which the State Department the support and approval of the gave encouragement to the move- engineering profession ment remains one of the many secrets of the long negotiations. It is known definitely that the effort fell can take it as admitted that all Agreement Plan Debated With other South American na-

tions unwilling to act, and with

Chile and Peru so involved as to be unable to broach a proposal for a new deal all round, state depart-ment officials have been advised from some quarters to acknowledge openly that a plebiscite is impossible, and propose a direct settlement. Indications have reached Washington that had such a step been taken Chile at least might have agreed.

During the time these things have been occupying the serious attention of highest officials of the department, General Pershing has returned to Washington after his trying service as head of the plebiscite commission,

situation could be solved-except by plebiscite, but every way out will be explored, and a diplomatic agreement obviating the necessity for election still is manifestly among

the possibilities. Peruvian Senator Pleads

Equality in Plebiscite LIMA, Peru, March 11 (AP)-The possibility of another war between Chile and Peru was predicted in the Senate by Laurito Curletti during a

speech on the Tacna-Arica Plebiscite problem. "Unless complete equality pre vails in the coming plebiscite which is to decide definitely the suzeranity of the provinces of Tacna and Arica, now under Chilean rule, it

will involve a fight for sovereignty which some day will terminate in war," the senator declared. After tracing the history of the

probably ended the disputes which have arisen in the Council, but for Brazil's unlooked-for tactics. A

Aristide Briand Ridicules Any Idea of a Plot

GENEVA, March 11 (AP)—The fact that M. Briand abandoned Paris at political life was taken as an indication of how serious the international situation had become in Geneva, for FLORIDA COLONY today opened with the League of Nations in peril and the entire Locarno policy of European reconciliation eopardized. The feeling everywher today was that only M. Briand could clarify the muddle growing out of in-trigue and struggle for privileged positions in the conduct of League af-As M. Briand stepped off his train.

pression was ridiculous, he said, insisting that he had always understood that some of the smaller powers sought seats in the Council. Enlargement of the Council would be a policy of wisdom, he thought. because if disputes arising from the operation of the Locarno Pact ever reached the League, as they must under certain contingencies, a majority of the great powers in the Council could not, under the rules, participate in the voting; hence the

Council states which were not con-

he declared it regrettable that affairs

had reached such a stage as to make

nected with the main Locarno ac cord.
The Spanish Foreign Minister,
Yanguas y Messia, introduced into the situation today what was regarded by some as a conciliatory note by insisting that what Spain would do in the event its demand for a seat was rejected had never been disclosed, thus giving the impression that Spain would not go the limit of abandoning the League if its aspirations were not attained. They Fit Like a Well Tailored Suit

CANTILEVER SHOES will give you the comfort that comes from foot freedom and an easy, natural fit. They are really flexible, not only in the sole, but in the arch, where flexi-bility is also needed. Heels fit closely, toes are rounded modishly to give you room, and the snug arches fit up closely to the arches of your feet. Isn't it worth while to wear shoes like these when they are also attractive to the eye? These pumps are a good example.

These graceful pumps are easy of

the feet and splendid for walking. Cantilever Shoes are sold from coast to coast and are within shopping dis-tance of practically all readers of this publication. If you do not know where to buy Cantilevers locally, write the Cantilever Corporation, 409 Willoughby Ave., Brooklyn, N. Y., and they will send you the address of a nearby Cantilever store and an interesting booklet, showing photographs of the new Cantilever models.

gete, today again demanded enlargement of the Council with a place for China, insisting that allocation of seats should not always be on the basis of military strength, but that more stable elements, like economic power, geographical position, great population and ancient culture, should be taken into consideration.

"To the criticism that there are military difficulties in China," he said, "we reply that our internal Council meeting will be held today, when Brazil's standpoint will be made clearer and its determination finally tested.

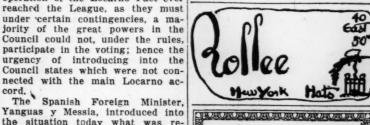

said, "we reply that our internal strife may cease at any moment, because, following the classical Chinese proverb, 'Brothers combatting brothers at home will, united, face external danger'."

The foreign minister of a small European country expressed the be lief to the correspondent today that Existing Against Germany the best way to solve the crists is nent chairs, and have all the seats in such an important moment in French the Council open to election by the

CHRISTIAN SCIENCE MONTOR, BOSTON, THURSDAY, MARCH 11, 1926

COAL SUBSIDY IS CONDEMNED

British Report Urges Acquisition of Mineral Royalties -Far-Reaching Proposals

By Cable from Monitor Bureau LONDON, March 11-The keenly uying off the trouble by an enor- settlement, us state subsidy "should now ease, and should never be reeated"; also that a catastrophe can nly be prevented by introducing a system, supported during the transition period by big cuts in profits and wages alike.

The commission subjects the proposals put forward by both coal-owners and miners to devastating iticism, and evolves a compromise cheme of its own, based on very us and complicated recomnendations

State Management Rejected

It rejects state management as demanded by the miners, but favors state acquisition of mineral royalties as to facilitate the regrouping of the collieries. It also lays down the far-reaching proposition that undeveloped minerals belong to the state. It would leave the seven-hour day untouched, and would keep wages on a national basis so far as a inimum is concerned, but it would evise the additional percentages which the men now receive locally as to materially reduce the renuneration of the higher - paid workers.

Against this it advises greatly imroved conditions for the workers in other respects. For example, would give them a direct share in he profits as shareholders in the ndertakings where they work, better ours and also family allowances to paid from a common pool.

At the same time the commission lvocates further state assistance in parketing the coal, also in introducng new processes and in making the itheads the center of subsidiary inustries including production and

Reception of Report

The report's reception is guarded. The Miners' Federation, representing 00,000 workers and the Mining Association which stands for the chief proprietors, both decline to commit themselves, either for or gainst it. Some South Wales iners have issued a manifesto trongly attacking it.

On the other hand, Frank Hodges, secretary of the International Miners' Federation, already has declared in ts favor. It is criticized in business ircles as "ideal rather than real," and as leaving the coal problem where it was. But its confidence in industry's ultimate prosperity is

ld to be well based. Generally it is regarded as a great tep forward, since it has lifted the rtain of suspicion hitherto separatng the miners and their employers, and brought out prospects which both can appreciate of the future to reached, it is true only through co-operation in mutual sacrifice

The Cabinet is now considering the report with a view of the earliest NEW ENGLAND RATES ssible legislation. The miners and he mine owners are also in session re, as decisions have to be taken n time to give them effect before ends, and failing an agreement, the the Interstate Commerce Commis-national labor walkout, postponed sion to deny the petition of New Engnational labor walkout, postponed from last August, will take effect.

BRITISH ENGINEERING LOCKOUT POSTPONED

Bu Cable from Monitor Bureau LONDON, March 11—The engineering labor dispute has taken on a new and more hopeful aspect with he employers' decision, announced today, to postpone for another week the lockout notices affecting 200,000 men which would have otherwise taken effect on Saturday. This has

PARTIES OPPOSE BRIAND CABINET

Communists and Socialists as Premier, to seek to repair possible damage done to French interests by Are Hostile, and Herriotists Displeased

By SISLEY HUDDLESTON By Special Cable

PARIS, March 11-According to his program, Aristide Briand this morning is at Geneva, where he faces a task perhaps less easy than the hasty construction of a nondescript cabinet. It is precisely the necessity for returning immediately to League de Monzie. of Nations headquarters which is given as the explanation of this mediocre ministry, which is treated coldly by all parties. Last night M. Briand left Paris in a fairly cheerful mood, not disposed to exaggerate the difficulties.

It would appear from reports re-ceived here that the difficulties are altogether different from those anticipated. It is observed that M. Briand's calming influence upon Po- RELIEF BILL SOUGHT land, exercised last week, remains fficacious, and it is from Spain that the menace comes. Whether the action of M. Briand will be successful as it was before the inopportune French crisis is doubtful, but in a brief statement M. Briand expressed entire confidence that Germany's entrance into the League would be arranged satisfactorily in time to permit his return Monday.

Will Cabinet Endure? Opinion here follows the proceedngs without excitement, not believ- now entirely out of place. ing that anything can arise to pre-

Attention has turned to the com-position of the ninth Briand Gov-first reading. ernment. What is facetiously called his "ninth symphony" is not considered harmonious. It is hard to see how it can endure. The Communists are naturally opposed. The Socialists must remain hostile. The Radicals are apparently divided, but the Herriotists openly express dis-Doumer, while antagonizing the Na- and Republican national committee tionalists by including Louis Malvy, woman from Illinois, is the donor. whose attitude during the war is re-

Electoral Reform in View Altogether, therefore, the combina-

membered.

ion appears weak and unable to stand the storm. M. Briand, personally, if he succeeds at Geneva, will receive a warm welcome Tuesday next when he faces Parliament. He will probably announce that the finance bill will be pursued, and, when passed, electoral reform will

This means that if the ground can e cleared in time and M. Briand can stay long enough, dissolution of the Chamber will be recommended before there is another upset. Whatever happens to these speculations certainly it would not be easy to find wholehearted optimism about the new cabinet in any quarter.

DIAMOND JUBILEE YEAR

DISCLOSURES ON TELEPHONE'S INVENTION COME 50 YEARS AFTER

Bell's Assistant Reveals Reason for First Conversation Over Wire-Early Associate Tells of Inventor's Effort to Transmit Speech on Ray of Light

Bu the Associated Press

Two striking facts became known sound. today concerning the telephone and its inventor, Alexander Graham Bell.

Selenium, like the photo-electric cell, is sensitive to light. It is a mineral whose resistance to electric president of the American Telephone president of the American Tel on the fiftieth anniversary of the current is decreased by exposure to first telephone communication in history. More than 47 years ago Bell attempted to talk over a ray of light. Yesterday D. C. Stockbarger, instructor in physics at the Massa-chusetts Institute of Technology in

Cambridge, succeeded.

A second disclosure was madethat the first telephone conversation call half a century ago was Bell's shout for help, the result of a mis-hap. Bell and his assistant, Thomas Watson were working in Boston over their apparatus when Watson, listening to the receiver in another room, heard the words, "Mr. Watson,

come here; I want you!"

Bell had unset a battery and spilled acid over his clothes. When Watson responded and rushed into the room, Bell was so elated that he completely forgot the damage caused by the acid.

Attempt to Talk With Light of radio, was told by Charles Eustis said, and continued: Hubbard, an early associate. Commenting on the early uses of the telephone. Mr. Hubbard said:

"I recall going onto the roof of a house in Washington about 1878 or 1879, with Mr. Bell, and watching him attempt to talk over a ray of light by the use of selenium, an anticipation of the radio."

CARLU EXHIBITION IN AMERICAN DEBUT

Work of Noted Architect Reveals Ancient Designs

An exhibition of architectural drawings and paintings is being offered for the first time in this country at the Rogers Building of Massausetts Institute of Technology on Boylston Street throughout the week. The works are those of Jacques Carlu, senior professor of design at Technology and director of the Fontainebleau School of Fine Arts at Fontainebleau, France, and have been loaned for the exhibition by the museum of the Ecole Nationale des Beaux Arts, Paris and the Institute of France.

Of chief interest are the original designs on the subject, "Palace for the Society of Nations in Geneva," which won for Mr. Carlu the "Grand Prix de Rome" in 1919, a prize ofin the competition. The drawing of the building itself measures approxiin the Karakoram range. The many

professional men sat at the head table as special guests.

Mr. Carty is a pioneer in the dewhich he has invented many improvements. As head of the development and research department of the company, he invented the "phantom circuit. This device is used only over toll lines.

One of his outstanding achievements is the popularization of tele-phone communication over great distances, which he had brought about by substantial reductions in cost, reflected in the rates. This he has done by making it possible to transmit several messages over the same wire at the same time. While a transcontinental conversation, for example, is being carried on, it is possible for any number of calls to be cut in on that line for shorter distances without interrupting the long distance message.

FISH CASE DECREE CHANGE OPPOSED

Independents Protest Move of Exchange

Efforts of the New England Fish Exchange to obtain a modification of the Federal Court decree in the famous "fish trust cases" in 1919, was declared today to be an attempt "to put a host of retailers out of the exchange" by Israel Ruby, counsel representing a group of independent president of the chamber, presided. fish dealers, at a preliminary hear-Engineering, telephone, college and ing before the United States Circuit Court of Appeals. Judge George H. Bingham and Judge Charles F. y is a pioneer in the de-of the telephone, for March 18 for the trial of the petition

submitted by the exchange.
William M. Noble, acting for the fish exchange, said that the modification requested was, he thought circuit" which makes possible three conversations over two pairs of wires, each pair of physical wires being used as one side of a third affected. The question hinges on admitting retailers and independent within the letter of the decree, but mitting retailers and independent wholesalers on the floor of the exchange, where they get information as to prices, but do not buy fish, according to Mr. Noble.

Edward R. Hale, assistant United States attorney, spoke in the interests of the public and said that some of the dealers think that their business will be adversely affected if the decree is modified. Mr. Noble made it plain that the exchange had no desire to put the least restriction on admission of dealers to the exchange if they would buy the fish there as the decree intended. The exchange asks in the petition filed in court:

The right to refuse buying privileges upon the exchange to any dealer who refuses to restrict his own business as far as it relates to the purchase of fish from vessels landing for the purchasing of fish from cap- of the editors for its newspaper style

emblematic of the soccer champion-ship of the United States, is fast near-ing the closing stages. This week-end may see the remaining survivors in the eastern and western sections in the eastern and western sections advanced for the all-important matches of the following week to decide the clubs which will represent the two divisions in the grand final,

delphia Soccer Club in the succeeding round and in the closing minutes only did the star center forward of the Steelmen, Archie Stark, manage to tally the winning goal after the Phille goal custodian had fumbled and thus end the game in favor of Bethlehem by 2 goals to 1.

The Cup Committee has announced that the eastern final between the J. & P. Coats eleven and the winner of the Bethlehem-Giants game will be played at Kingsley Park, Providence, R. I., March 21.

played at Kingsley Park, Providence, R. I., March 21.

In this year of soccer upsets, another surprise came to pass last Sunday in the Missouri district when the Ben Miller Football Club eliminated the Vesper Buick Football Club, 2 to 0, in a divisional semifinal. Two years ago the Buicks represented the cream of western teams in the grand final against the Fall River Football Club and are, at present, leading the race in the St. Louis Soccer League. This record naturally made them favorites; but the elusive forward line of the ers proved too much for the loser's

defense.
Six years ago the Ben Millers won the cherished honor of holding the Na-

ter Laufer of the Cincinnati Central Y. M. C. A. in a 100-yard race in 1m. 63-5s. Laufer continued to 150 yards, finishing in 1m. 443-5s., which improves on the official mark; but he has done 1m. 432-5s. this year.

Harry Glancy won by a large margin in a 500-yard freestyle handlcap, in which Joseph Farley of the New York A. C. received a 1s-second allow-York A. C. received a 15-second allowance. Glancy was timed in 5m. 56 4-5s., which broke the Metropolitan A. A. U. record of 6m. 12 2-5s., held by Herbert Vollmer of the New York A. C.

Arnold Horween '21 is the new head coach of the Harvard University football team of 1926. This announcement was made over the telephone last night by William J. Bingham '16, Director of Athletics at Harvard. Horween's selection comes as a big surprise, as he had not been mentioned publicly for the position. He lives in Chicago and was captain of the Harvard informal eleven of 1918 and the regular eleven of 1920. He played center and fullback and was a star in both positions. He never played on a team losing to Yale, and he was the individual star of the Harvard team which defeated University of Oregon in the East vs. West game at Pasadena, Jan. 1, 1920, 7 to 6. Since graduating from Harvard he has kept in close fouch with football, especially in the middle west. HARVARD NAMES A. HORWEEN

events this year.

J. J. Aleksi '28 is being groomed as

Kaer Not to Compete

Kaer, who starred in ttack as a freshman, but chose basketball instead of track last year under the two sports' rule, will be the "iron man" of the squad. Kaer runs both high and low hurdles, dashes off the sprints, runs the 440, throws the javelin, broad jumps, and competes in the hop, step, and jump. He placed sixth in the pentathlon at the 1924 Olympic games.

Coach Cromwell has decided to use Kaer in the low hurdles, relay, broad jump, and javelin throw in all dual events. In the I. A. A. A. A. he will enter the low hurdles, javelin and broad jump. So far this season, Kaer has made 24.4s. in the low hurdles.

In Paris, Kaer hurled the javelin 186ft., which gave him first place in this event in the pentathlon. He has already made over 170ft. in this event in early eason practice. C. G. Olson 126 suprepied coaches when he throw.

SCHOFIELD ELECTED CAPTAIN

STORRS, Conn., March 11 (P)—William K. Schofield of Waterbury, Conn., was elected captain of the Connecticut Agricultural College basketball team for 1927, at a meeting last night of the season's letter men. Schofield is a junior and has played both as forward and guard for the Aggles during the last two seasons.

186ft., which gave that this event in the pentathlon. He has already made over 170ft. In this event in early eason practice, C. G. Olson in early eas

MINNESOTA WINS TITLE

MINNEAPOLIS, Minn., March 10 (P)—
University of Minnesota won its third
"Big Ten" hockey title in four years, with a 4-to-2 triumph over the Wisconsin six, here last night.

DARTMOUTH DEFEATS ARMY
WEST POINT. N. Y., March 11 (P)—
Ourtmouth College defeated the United States Milliery Academy, 27 to 17, in a gymnastic met here yesterday.

Cook '26 will be good for some points this year.

Kaer's weakest event will be the broad jump. While he is good enough to place in dual meets, it is doubtful if he could score at the Intercollegiates. He usually jumps around 22ft. 10in. His nearest competitor is Albert McDaniel '28. Reynolds will also enter this event. R. R. Lee '27 is also training in this event.

Southern California is strong in the high jump. Coggeshally former inter-

OVERTIME TO DECIDE

ITHACA, N. Y., March 11 (Special)
—Cornell University defeated Dartmouth College by a score of 25 to 16 in an Intercollegiate Basketball League game, last night, and put up the best exhibition of the season in its last home game. Cornell's floor work was fast and clever and its defensive play effective.

STILL LEADS

Schaefer Wins Second Block but Is Far Behind in Grand Total

work was fast and clever and its defensive play effective.

The teams were tied at 7-all five minutes after play started and then M. S. Dake '26, playing his last home game after three years on the varsity, threw three baskets in four minutes, and a foul by Theodore Schlossbach '28 gave the Red and White a commanding lead. At half time it stood 15 to 8, and though Dartmouth made two efforts to rally in the second half, Cornell was more than equal to them. The summary:

Heep 2. Zanger, for Dartmouth. Referee—Brenan. Manhattan. Umpire—Risley. Colgate University.

Special from Monitor Bureau

NEW YORK, March 11—The Columbia University basketball team finally and thoroughly settled the Intercollegiate Basketball League championship last night, when it defeated the Princeton University team here by the top-heavy score of 46 to 25. This victory places the local five two clear games ahead of Dartmouth College with only one game to play. W. G. Laub '26, playing his last year for the Blue and White, was the hero of the occasion, scoring 15 points for the home team, against C. M. Loeb Jr. 26, the Princeton captain, on defense, and displaying altogether the best all-round play of the evening. Loeb is the leading individual scorer in the league, his points now totaling \$7. J. T. Lorch '27 and John Rothenfeld '27 were also effective, while Norris and R. F. Kirchmeyer '26, who went in as substitutes at the start of the second half, were fully equal to the regulars. At the end of the game the third lineup of the new champions the second half, were fufly equal to the regulars. At the end of the game the third lineup of the new champions went into play, and while holding the visitors scoreless actually scored a final goal, when S. B. Potter '27, at center, sent the ball in just as the whistle blew to end the game. Loeb scored 11 points for his team, but was unable to do much on defense.

COLUMBIA PRINCETON

REISELT DEFEATS COPULOS
PHILADELPHIA, Pa., March 11 (Special)—Victories in both games yesterday gave Otto Reiselt of this city a clean sweep of the six-tilt series with G. L. Copulos of Detroit in the title race of the National Championship Three-Cushion Billiard League. Reiselt won yesterday by counts of 50 to 37 in 40 frames and 50 to 44 in 49 efforts. High runs of 6 and 5 were made by the winner, a pair of 4s by the loser.

SENIOR PLAYOFFS START

TORONTO, March 11 (Special)—The Canadian Amateur Hockey championship series can now be outlined correctly, the last of the eastern Canada teams to qualify being returned last night. In the senior series Peterboro and New Hamburg, the O. H. A. senior and intermediate champions, meet on Thursday and Saturday, and the winner of this series will meet the University of Toronto team, Intercollegiate champions, next Tuesday and Thursday. The Ottawa Gunners won the Ottawa Valley title last night by defeating Pembroke, 5 to 1, and will now playoff with the Sons of Ireland of Quebec to determine the team to meet the survivors of the Ontario section, Peterboro, New Hamburg or Toronto University. The winner of the eastern Canada series will meet the western Canada representatives in the final two-game series in Montreal on March 24 and 26. In the junior series Kingston and Young Sons of Ireland of Quebec will meet and the winning team will go West. SENIOR PLAYOFFS START

LAYTON WINS SERIES ner, a pair of 4s by the loser.

NUNN-BUSH SHOE STORES

Edward and Percy Receive Gifts

Oh, to have an uncle
With so great a heart,
When he's made a visit
And it's time to pai
Always from his pocket
Comes a penny piece
For his little nephew
Or his little niece!

OW Uncle Henry Elephant had been visiting Edward's father and mother, and when it came time for him to go home Edward Elephant and Percy Pig were not far away, for Edward was very fond of his Uncle Henry because he was such a good uncle, and Percy was very fond of Edward's Uncle Henry because he was such a good friend of Edward's that he was just naturally fond of anybody that Edward was fond of. So there they were—Edward and Percy—when Uncle Henry was saying good-by to Mr. and Mrs. Ele-phant, and so Uncle Henry kissed Edward and shook hands with Percy and felt in his trousers' pocket and

found his coin purse, and opened his coin purse, and took out two coins. "Here," said Uncle Henry, "is a penny for you, Edward. And here is a penny for you, Percy, for, although I am not your uncle, I feel kindly toward you. Also, I have known your father ever since he was a young Pig, and many a good time have we had together. I do not, insist that you should put these pennies in your bunny banks, but it gives me pleasure to think that you will not spend them on selfish pleasures, but will seek some way of spending them that will give me pleasure to hear

"Thank you, Uncle Henry," said "Thank you, Mr. Elephant," said

Percy.

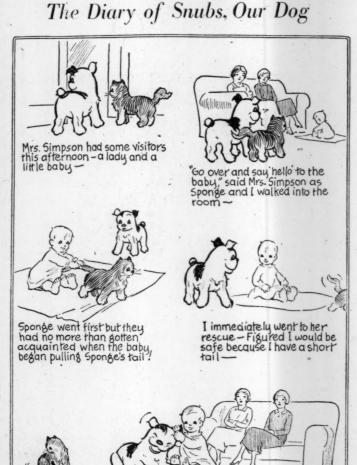

Then the station bus came along. and Uncle Henry got in with his bag, and waved another good-by to Mr. and Mrs. Elephant and Edward and Percy. And Mr. and Mrs. Ele-phant and Edward and Percy all waved good-bys to Uncle Henry. And Mr. and Mrs. Elephant went in

"I know what I'm going to do with my penny, Edward," said Percy Pig. "I know what I'm going to do with mine, Percy," said Edward Elephant. "I'm going to buy you a stick of peppermint candy, Edward," said

and bought a stick of peppermint candy just for myself." "Let's go right down to the store this minute, Edward," said Percy. "I do so want you to have your stick of peppermint candy." "Come on, Percy," said Edward.
"Let's run. I shall not be happy till
you have your stick of peppermint

So Percy Pig and Edward Elephant ran as fast as they could to the store, and Percy bought Edward a stick of peppermint candy, and Edward bought Percy a stick of pep-"And I am going to buy you a permint candy. And then they stick of peppermint candy," said walked back to Edward's house, ddward.

"It will please your kind uncle so eating his stick of peppermint candy much more than if I went and spent and talking about what a good, kind his gift for a stick of peppermint uncle Edward Elephant's Uncle candy just for myseif," said Percy. Henry was, and how pleased he "It would grieve him bitterly," would be to know how they had said Edward, "if I took this penny spent their pennies.

But fiddlesticks, my short tail didn't do me much good—The baby was too interested in my ears to notice it!

PHI BETA KAPPA SEEKS FUND OF \$1,000,000 FOR SCHOLARSHIP

nearly \$40,000 already have been

Rockefeller said: nearly a hundred college presidents expressed their discontent with the condition of scholarship among their students. The reasons given their students. The reasons given their students. The reasons given are various, but the central one is expounder of the Constitution, beof scholarship, a diminished respect for learning. Since the war our colleges and universities have not only

gether with the unprecedented in-crease in the number of students

has come an increase in the cost of overworked. Obviously overworked faculties have their counterpart in underworked students. Moreover, the teaching force is uneight years.

Mr. Rockefeller said the duty of aiding in the restoration of scholar-ship and teaching to their rightful place rests upon Phi Beta Kappa "because it is at the same time the oldest, the largest and the most distinguished society of scholars in the country." Continuing, he said:

"As regard age, Phi Beta Kappa and American independence were born in the same year. As to size Phi Beta Kappa comes to its sesquicentennial anniversary with 107 chapters and over 40,000 members, while Lord Balfour, in acknowledg-ing election to Phi Beta Kappa, in-dicated how distinguished he thought it, when he said: 'This is the greatest honor which you could possibly confer upon us or which we could possibly receive. Moreover, the men of Phi Beta Kappa make an array of varied talent, achievement and ability, such as no other society, on

Estimating these Professor Stratton believes the grand totals would be in the vicinity of \$300 and \$450, respectively.

thing into consideration, thinks there

The difference between the cost for students living at home and not living at home can be much reduced by students earning their board and room, Professor Stratton says. While no statistics on the group not living at home but working in spare time were drawn up this year, last year's figure showed the difference in cost under this plan as \$51.90. In compiling the figures all exceptional cases that would tend to distort the average inaccurately were

Two Stockholm Residences

Special Correspondence THE Stockholm Town Hall, or ish villas too often appear isolated, berg prefers to call it, is unquestionably his best known work abroad because of its monumental beauty and original style. At home, however, he is also famed for his original and distinctive residences. Two examples of his homes, typical of his originality and distinction, will be discussed here. As each is indi-vidual in style, adapted to its particular site and purpose, one is not more representative of Mr. Ostberg's work than the other.

As in the case of the Hotel de Ville and the Patent Building in Stockholm, simple and inexpensive materials and straightforward designs have been employed for these houses. And, like the Town Hall, the first con-

"For some of us who are a little out of tune with present-day conventions," said Mr. Ostberg to a representative of the Monitor, "home architecture has begun to exercise quite a gripping interest. This art, which is always an index of its time, in the nineteenth century led a rootless existence, founded, as was all education of that period, upon dogmatic and laboratory learning. Natural growth, the temperament of a people and traditional background ere regarded as negligible factors in the architecture of that period, which consequently bore the stamp of having been forced rather than of being the result of natural growth. When learning has less attraction for architects, and the roots of true education strike deeper; the time will surely come when architecture, as in former times, will at the same time gladden a people and be their best testimonial." *** * ***

The Geber house stands in the socalled Diplomats' Town, a district in Stockholm somewhat resembling the English countryside, in which is to found the English Legation, the English church and several diplomats' and statesmen's residences. One side of the house faces Djurgårds Bay to which a flowered terrace slopes. Across the water stretches the natural park of Djurgården and beyond lies Skansen From the other side of the house one sees the English church, which stands picturesquely in a fork of the

salon commanding a view over

ceiling, wonderfully painted by place is a monumental relief fragment sculptured by Christian Eriksson. The boughs of the old trees about the house bend over it, and one feels that the architect has ful-filled his ideal of harmonizing the house and its surroundings so that all sense of newness is lost in the American Indian Art feeling that the building is an outcome of the site.

It is just this ability for adapting building to site that Mr. Ostberg admires so much in English archi-"Their homes and cottages," he declares, "are often little won-ders of that ability to harmonize nature and architecture."

Thorsten Laurin's house, built in the natural park of Djurgården, resembles a country house, although it is technically in the City of Stockholm. Its picturesque situation on the top of a hill which rises precipitously from the water front, gives a bold and commanding position. The architect has endeavored as far as possible, to subordinate the house to the natural surroundings so that, when its grey shingles are weathered, it will be quite inconspicuous. These shingles were treated in a special way with vitriol, and have now toned down to the

Singer of Songs...

Mr. Whiteside's rôle portrays a picturesque figure, equally at ho in the desert, in Cairo, or in the financial and business circles of the world. But his great charm is in the Oriental wealth of poetry which is a part of his being and which has drawn his English daughter to the desert to search for a father known only through the descriptions of her

Abdel Rev is shown in Cairo directing the journey of several British officers in charge of an expedition against a bandit chief Zantra. The efforts she joins the caravan dis-

guised as a camel boy. Abdel casually informs the fiery with rifles and ammunition, and goes on to point out the safest route through the desert. The officers distrust him, as he expected, and not taking his advice, proceed directly into the midst of their enemies.

But Abdel Rey arrives before them by airplane. They are disarmed and become his enforced guests while he insists on treating with them on behalf of Zantra, and entertains them meanwhile with radio music from London. The youthful captain is also reintroduced to his fiancée by their host who finds nothing more pleasant

The production was enthusiasti-The cast includes several of the cally received, and in response to

in itself has gayety of mood, even in the sentimental numbers, and has a marked melodic swing that does not become choppy in its most syncopated phases, as played by the "Rainbow Rose" Orchestra. Each member of this orchestra plays his part for its due value, with the result that the accent of the score's inner voices enriched the ensemble numbers, and the accompaniments were models of their kind.

kind.

In the music for Mr. McFarlane's songs, the delicacy and accuracy of the accompaniment was of uncommon quality, as it provided tonal background and shading for every turn of the lyric emotion with which his mellow baritone tones are charged. His ingratiating individuality won the audience at sight last night, as always, and his singing and acting alike gave unbroken pleasure throughout the evening. Not the least pleasant thing to see was Mr. MacFarlane's unfeigned delight in the success of his associate entertainers in a company marked by youthful enthusiasm and trained ability.

Pretty and merry are the numerous

Knowing that John Bruce was wealthy, the people of his home town on Cape Cod offer him an expansive welcome when he returns for a vacation visit. When he allows them to think that he has lost everything through the collapse of one of his business enterprises they suddenly cool off, disappointed in their hope of sharing in some way in his prosperity, they offer what they can of their own to help him, and after the chill of their momentary selfishness he is warmed again by their generosity. Because the story of this musical comedy can be told in these columns, it is a pleasure to tell it in part. How it is worked out in detail may be left for those who have prepared the entertainment to tell in their own agreeable way.

Not often does a musical play meet with such sustained approval on a first night as "Rainbow Rose" received last night from an audience that filled the Plymouth. The music

T OVE of books may come in many the vehicle of their own personal ways, along channels too devi- vainglory. This man whose name ous to retrace in memory. To never appeared on any title-page most readers it comes so early, per- spent his time among books to far

I first bought a book of him-Joseph of us can recall some influence of Strutt's Sports and Pastimes of the English People, edited in 1830 by William Hone, "with a copious index." Plunging into the cool shadows of his shop out of the garish and noisy never be mine, it was a comfort to hold them in my hand, to read a page or two here and there, and to share imaginatively in the delight of the rich man who would eventually set them on his shelves. These were only such blossoming.

The night is still and soft and language of the solid copy of the s three or four previous owners had treated it well, had enriched nearly every page with judicious marginal jottings, and had worn off all unpleasant newness so that it was at last quite mellow and ripe. I rememhandling an old volume, rather than by any knowledge of its contents, he suggested unforgettably to the most ness, succeeding so well that at last bookish youngster, on his mettle about scholarship and somewhat proud of his little accumulation of hard fact, that books are to be loved as well as known. He added the as well as known. He added the as well as known. He added the as well as known as well that at last it seemed a wonder that I had been able to get along for years without tit. And then too, the woodcuts, one hundred and forty in number, had a quite irresistible naïveté, and the warmth of affection without which green leather back held the eye, lured the hand, compelled a purchase. (The book lies before me on my desk as I write these words, and I know I

never found out. I did not even try ation of my worldly wealth, found it to discover, for more and more, as just about sufficient, and then, walk-I grew to know him, it became clear ing over to the white-haired proprithat any leading questions under that head would be in a double sense impertinent. He who had so manifestly times. It must be that he had alther fine essence of erudition—the fine essence of erudition—the ready formed a favorable opinion of the ready formed a favorable opinion sleeve, turned to a few of the more interesting woodcuts as though they were old friends, and then said, very kindly but with a penetrating glance "Young man, do you know the value

"Oh, as to that, I want to use it in my study of the Elizabethan

"Have you already read some of that literature?"

I told him, with some boyish pride hat I had read all the way through Dodsley's Old English Plays. "Which edition?" said he.

"W. C. Hazlitt's." earlier editions. Well, it seems to Strutt ought to do very well in your hands. You may have him for two dollars and a half," (I learned later, when I had by chance dis-covered his trade-word, that this was just what the book had cost

He looked the volume over again, more carefully, as though he were bidding it farewell, wrapped it very carefully in paper, and handed it to me with a little bow. The whole transaction was an accolade. I had been dubbed a knight of letters.

+ + +

Many times in the days that folowed I stepped into the little shadowy shop to talk with my friend about books and their makers. He told me, on one occasion and another, of books that he had sold as a young man to Gladstone: and he had seen Tennyson. He had wrapped bills, long unpaid, to impecunious London and his earlier days in Exeter, the impersonal enthusiasm of had consisted chiefly in bringing together the right and the right people-and this, as I came to understand, is really an exigent art involving great care and many minute considerations. His work had been done with a love of books equaled only by his love of human beings. He was justly proud, as a true artist has the right to be

of his outstanding and memorable successes, and retained many an amusing recollection of his failures. All this was a good many years ago, and I should not know wh look now for booksellers of just his kind. I do not say that the race has deteriorated, for certainly the young men one sees in bookshops today are alert then he, and display no hesitation whatever in making a sale. Not many months after I came to know him well he returned to Engnever returned. In the absence of definite information, those who remember him at all are free to think of him browsing all day long among the bookshops of Holborn and open-air stalls along the Seine, or perhaps in the excellent book town

of his boyhood-ecclesiastical Ex-Wherever he may be, I wish him great joy in books, for he taught me how to transform the most monotohas been in my own dealings with paper and ink any glint-not to say glow-of enthusiasm over and above what can be paid for in coin of the realm, I owe it in some degree to this almost forgotten bookseller who made me see how love of one's business into the gold of art.

YOUNG FOLKS' PAGE

Penny Wise

By EMILIE BLACKMORE STAPP Synopsis

Synopsis

Judge Wiseman and his young daughter, Penelope, lived in the middle West, Margaret, a faithful Scotchwoman, being their housekeeper. The judge suddenly awakened to the fact that Penelope, then a freshman in high school, was growing up faster than he wished. He felt that perhaps the time had come when it would be better for her to go away to school, and decided to send her to Brooks Manor, where her mother had been before her. Penelope finds that her roommate is Virginia Lee, and is introduced to her housemother, Miss Andrews. She learns that the school motto is "Live to the Truth." Merry Polly Cray adopts "Penelope as her new girl, and at "the baby party" causes much merriment as colored mammy to "baby" Penelope. As is customary, the Brooks girls visit Hope Farm, a near-by orphanage, where they each adopt an orphan for the school year. Mary, a thin, homely little girl, is chosen by Penelope and rejoices that she is to have a whole Brooks girl all to herself. Sometimes there are not enough girls to go around. When a week passes without a letter from Penelope her father decidect to come East to see her. While he is speeding toward Brooks Manor she is thinking of him and longing to see him because of an unwelcome secret that has come to her. Judge Wiseman arrives at Brooks Manor and is given an eager welcome by Penelope. During a walk with him she confides that she is troubled about a discovery she has made, but is not certain her suspicions are correct. This being the case, her father advises her not to tell even himself, since the secret involves another. Judge Wiseman and Penelope visit Hope Farm, and obtain permission to fake Mary to the village inn for luncheon. She is thrilled over the experience.

CHAPTER X

Thanksgiving at Brooks Manor

WAS early when Penelope wakened that gray November morning and wondered with a start what had happened to the rising bell. "Virginia, Virginia, why don't you get up and proctor? That bell surely must have rung."

Virginia turned over lazily and her sleepy voice sounded almost impatient. "Don't you remember, Penny, that this is Thanksgiving vacation and all rules are sus-

"And what I know you think is better still," answered Penny, "it's the day you go to New York."

At these words Virginia was wide

me just when I did than at any other time," said Penny. "You keep forgetting, Virginia, how busy he is. He couldn't stay East any longer. Polly says it's heaps of fun here at Thanksgiving, and that she is almost sorry to be going away."

"Polly would say it is fun, of fun," retorted the older girl.

She thinks everything is torted the older girl.

I don't know about that."

She thinks everything is be uncovered. They were inwardly much excited, for their little escapade seemed somewhat like the rattled as he walked. "Oh, I don't know about that."

Penny then changed the subject, determined that Virginia should not disturb her peace of mind. "You'll voured before coming to Brooks have a grand time with your

made and furnished with a wellproportioned paper tail, it may be successfully flown at great heights with no difficulty.

It might be helpful to remember

these things in flying a paper kite. If the tail is too heavy, the kite will soon let you know. If it is not long enough, the kite will im-mediately loop-the-loop and come down-that then, is your surest sign that the type of tail is not just right. Never yank or tug on the line when the kite is high up, tecause there is much strain on your twine-you might snap it. Never try to fly a small kite with heavy string. You should rarely use anything but heavy linen twine for any kind of kite, as this is sufficiently strong to

Always fly your kite at an upwardslanting angle; this prevents much spinning and makes the tail perform its proper duties as a balancer. It is cant fact is that all great soarers top and bottom, are quite sufficient. wing beats, have no such ridges.

in mid-air.

To make the kite, wrapping or neswpaper is quite good enough. Cheesecloth is needed only for box kites. Contrary to what is often supposed, there is no great strain on the paper of the kite, the strain is only where the twine has been tied, and in the midway between the kite and the one flying it.

In Europe, little boys and girls fly their kites hundreds of feet in the air-so high, sometimes, that they can scarcely be seen-and they are always adding rolls of twine to their tin-can spools to make the flying postests are held for the purpose of determining the kite fliers' altitude records, which may easily be checked has completed a bird bath by the quantity of twine used. Why which is probably unique not try this? It is lots of fun!

A Riddle for Students of Aviation

Students of aviation are trying to solve the riddle as to how the albatross and other great "soarers" make effortless flight without wing beats.

Special investigation of this phenomenon has been made at flying carnivals in France, Germany and Switzerland, but without any definite results.

All birds which have this wonderful power of gliding here and there with motionless outstretched wings are alike in one respect. Underneath their widespread wings, as hold it, and will not tangle so easily they extend them in soaring, are clearly-marked transverse ridges. What purpose these underneath-

its proper duties as a balancer. It is not necessary to tie the twine in have them, whereas birds which do four places to your kite-two places, not soar, but move only by constant An ingenious theory is that by means of these ridges the birds focus, or compress, wind eddies as

they sweep beneath the wings, and so manage to extract not only an upward "lift," but also a propulsive effort from them. Another explanation is that the bird is able to vibrate its apparently motionless, wing, so that the transverse "rays" accelerate the wind-flow

under the wing and obtain a reaction which drives the bird forward without any visible wing effort.

Speaking Across the Atlantic For he first time in history New York and London have had a wireless "There's a porky in the house," a sleepy voice exclaimed. Two bare feet hit the floor. A match was scratched and a candle lighted. "Yes, American Telephone & Telegraph of-

fices in New York and a group at the General Post Office, London, Eng., and so clear were the voices wafted over 3500 miles of sea and land that they might almost have come from across the street. These men had been called in to test the success of experiments carried on for many weeks. There was no doubt as to the success of these, but engineers at both ends of the wires felt that much would have to be done before such transatlantic communication would become suitable for commercial purposes. The high wavelength made reception by ordinary receiving sets impossible, and the cost at present would prohibit

general ase. One interesting coincidence connection with this experiment is that it commemorated the fiftieth anniversary of the day Alexander Graham Bell procured the patent for his first telephone—although the impor-tance of March 7 in the history of the telephone had been overlooked by the engineers themselves.

Chicago, Ill. Special Correspondence next have upon the composition problem, supplementary data were lege English, including all Eng-lish subjects, is below that of the replies of more than 700 teachany department compared, the next ers shows that under ordinary concost exceeding English by 17 per ditions of forced and inefficient ef cent. College freshman English com- fort, the average reading rate for sition costs about one-third less college instructors is 2600 words than the average for all English sub-jects, and 43 per cent less than the average cost for the nearest de-when more careful and thorough atpartment outside of English.

Because of its larger student enrollment, the average total budget cost of college English exceeds that of any other department compared, the next in order costing 25 per cent less. In average student enrollment it is 11 per cent above other departments, and in the average number of students per instructor it is the high-

est but one, differing by 2 per cent.
The student enrollment for college freshman composition is 51 per cent of the total for English; its student enrollment per instructor is 9 per cent above the average for English, and about 7 per cent above that of the only department that exceeds English in this item.

To reduce by one-third the average total number of students assigned to instructors in freshman English composition, leaving other English subjects and conditions unchanged, would bring that number near the theoretical upper limit of efficiency, which, it has been ascer

tained by careful survey, is about 60. The data for the college half of this survey were collected from 345 teachers of English in 96 colleges located in the United States, chiefly in the East and central West, next the far West, and lastly the South. The replies received were so careful and accurate and complete that they seemed adequate for the purpose of this study.

Following are some of the questions asked, together with the replies gleaned from the 345 teachers: Place of Theme-Writing

Is theme-writing necessary in English composition teaching? tunate as to be on the wrong side That is, can the labor burden of such teaching be sufficiently lightened by substituting oral for the traditional difficult to retain instructors in Engwriting exercises or by shifting the lish composition than in any other

emphasis from written to oral work? subject. Other reports certify to the Although this suggestion has been frequently advanced in late years, and was not long ago made the subject of extended experiment, it finds no support whatever among those replying to this questionnaire. The rote is unanimous that oral training alone is insufficient. The general opinion expressed is that composition exercises should be half written, and half oral.

If theme-writing is necessary, how much of it is done under present conditions, and how much should be may be increased to 43. done under favorable conditions? The amount of theme-writing under reported conditions averages for colleges 630 words a week during the year. More ideal conditions would increase this average to 680 of 104.1 pupils to each teacher. Of these teachers, 110 average 120 pupils words weekly, while making possible equal attention to oral and to writ-

What ought to be done with this replies in connection with preceding data indicate that for a class of aver-

amount of manuscript, and what is actually done with it?

All replies practically agree that the average of the necessary reading not to give attention to all the second not to give attention to all the written work done by a pupil destroys This means that the average number his interest; that every written exercise should be carefully read; that composition teacher is more than two in addition to such discussion as is possible in class there should be individual criticism of every exerindividual criticism of every exerof the exercises need to be re-writ-ten, and that re-written exercises should be re-examined. As to the second part of the question, the reolies varied greatly. In some colleges where conditions are favorable manuscripts are read orally in private conferences with individual students, a method satisfactory, but requiring more time than does written criticism, for in such conferences 'a student must have time to think." and the instructor "must have time to get the student's point of view.' ne instructors take whatever time is necessary to read manuscript up to 50 hours a week, supplementing this reading with class discussion and with whatever of private conference is practicable. Other instruc-tors read but part of their manuscripts with or without the assistance of student readers, and either destroy the remainder or return it credited, but unread. Others, and these greatly in the majority, leavor to read all manuscripts, but with extreme haste and consequent "skimming" and "slighting." Relatively few instructors find it possi-ble by any expenditure of time and vitality to give proper attention to even one-half of the exercises re-

How fast can themes be read? Because of the peculiarly vital

COMMERCIAL SCHOOLS COLLEGE

RATT SCHOOL

cent of the schools reporting, their What is done with excess manu-

scripts that cannot be read? Skim them mostly, 19 schools; credit it unread, 9; destroy it, 3; some turn it over to readers employed by the college, or by the instructor at his own expense.

On what is the stress placed in criticizing manuscripts?

A summary of all replies reveals the following: The stress is placed chiefly on spelling, punctuation, and sentence form; more lightly on paragraphing; more lightly still on general structure; less on artistic qualities, and least on personal qualities, although the colleges do not ignore these entirely as other schools often

What is the estimate, in number of words, of a year's work in theme-reading, and in writing and correcttention is given, this rate falls to 2200 words an hour, or about 2000 words an hour for the majority of ing and criticizing, for a single in-

teachers. For re-reading manuscript College theme-reading, 1.568,000 words a year; writing of criticisms

> Is the work of composition teaching unduly or unfairly burdensome? Yes, 193 teachers; no, 90 teachers, Ratio: 2.14 to 1,

Can you obtain satisfactory re-

sults? No, 153 teachers; yes, 116 teachrecting and criticising manuscript? ers. The affirmative replies to this question were usually negative in teachers indicates that for maximum effect, because they were qualified with the statement that the work done is "as satisfactory as could be finite period the limit is 2.07 hours expected under the circumstances."

If results are not satisfactory, why

In all schools because of overwork large classes, and lack of time and of pupils, lax ideals, and lack of respect for English in the college itself, lack of opportunity for conferences with students, lack of co-operation by other instructors, and a careless attitude on the part of authorities.

Proper Conditions What are the proper conditions for

efficient and successful work? The number of pupils to a college composition teacher should not exceed 60; the number in a section 20, three or four recitations weekly for each section. Fifty per cent of the work should be oral, 50 per cent written. The average number of writorally or in writing; if the latter, from 50 to 75 per cent of the criticism to be written out in full, and the rest indicated with symbols. The most defective exercises, usually about 30 per cent, should be rewritten and re-read, carefully with English composition teachers? the pupil or hastily for verification, according to circumstances. An alor three weeks with pupils who need

Study Projects for Monitor Readers

Do you favor enlargement of the League of Nations Council so as to include Poland, Spain and other countries, in addition to Germany?

Why is France championing the cause of Poland?

It is argued that the inclusion of Poland, Spain, and South American countries among the permanent members of the Council would create rival Nordic and Latin blocs within the Geneva organization. Do the facts, as far as they are known, sustain such a thesis? What are Nordic and Latin races? Would a struggle for domination between these two races in-

volve the future of the League? Why? If the decisions of the League Council must be unanimous, would enlargement tend to prevent unanimity?
(See Monitor of March 1, 2, 3, 4, 5, 8, 9.)

We are in the midst of an era of great consolidations, especially marked in the public utility field, electric light and power companies, telephone and telegraph systems and hydroelectric companies. More recently there has been a merging of food-producing and handling companies. In your opinion, will this result in a cost reduction that will redound to the advantage of the consumer?

Or is the individual store or factory on a competitive basis, with open markets, best for the consumer?

Will this merging movement result in hastening the formation of co-operative selling organizations among the producers of the world's staple products, such as the grains, sugar, and textiles? (See Monitor of March 5, 6, and Jan. 20, 21, Feb. 3, 8, 9, 11, 12, 13, 17, 23.)

Two questions, based on matters of public interest recently printed in the Christian Science Monitor, are put regularly in the above form on the thursday Educational Page. The purpose of these questions is: To assist a more thoughtful reading of the Monitor—on the part of all its readers. To present questions adapted to use as the basis of discussion or debate in econdary schools and colleges; frequently one for the upper elementary

work to be done, and because the man composition. mental and physical effort in themereading is greater than that of teaching. The actual allowance, averaged strength for necessary theme-read-ing; because of lack of preparation structors, should be to count 1.67 ing, while limiting the total as previously indicated.

How does the labor of composi-

The replies to this question were the same in the cases of both sec-ondary school and college teachers: It is always much heavier, sometimes incredibly so, often including more than three fewer, and not counting in either ten words weekly from each student subject the time required for prepshould be from 650 to 700, all to be criticized with the utmost care either specific answers to this question makes the proportion of English composition labor to that of other instructors, with the occasional exception of science, 1.75 to 1.

A large proportion of teachers reto regard their profession as a perindividual consultations should be held at least as often as every two held at least as often as every two teachers frankly confess discourage—the work undone; that is in propor—open to members of the council and them, and that they should average larger colleges, express intentions better place in view"; "My classes instructors. happen to be small"; "I refuse to overwork, slighting my duties when necessary"; "I like my work, even if it is hard"; "I have been trained for London Scho lowed for in the teaching schedule, for this work, and can do nothing the relative proportion of each to be else, hence am helpless to change"; "The work has compensations": "We hope for better things." The more cheerful replies come usually from teachers who are well on the right side of the average. As to pay, in 13 colleges out of 58, English teaching the London schools, and also to

coincided with a great change in teaching methods, whereby class teaching has given place to indi-

vidual teaching.

Emphasis was laid, during the latter part of the nineteenth and twentieth century, on oral instruction. Latterly there has been a reaction against a system which implied a passive attitude on the part of the child and active talking on the part of the teacher. It is now recognized child need a constant supply of fresh literature upon which to feed, and one of the aims of the London County Council, therefore, has been to make available an ever-increasing amount of reading material, and thus realize the ideal.

As a result of the developments which have taken place during the 20 years of the council's administraion, elementary schools are now supplied with books in four different ways: (1) the requisition list, (2) the circulation scheme, (3) the loan collection, (4) the education library.

Each head master or head mistress decides what type of books shall be supplied to the school, subject to the general proviso that no book may, in the ordinary course, be ordered which has not been specifically approved by the council,

each half year. By interchange Canada.

jurity of these being English classics: torios and 25,000 copies of instru-mental selections. This music is in circulation mainly among the Loudon evening institutes but the simpler items of vocal music are also used in the elementary schools.

MORE STEADY MOVEMENT OF SECURITIES

General Trend of Active Stocks Upward—Few Soft Spots

NEW York, March 11 (A)—Constructivé forces were again at work in today's stock market, with the result that general list swung upward un-der the leadership of the railroad and

oil shares.

Chesapeake & Ohio issues were the outstanding features, the common climbing 5 points to 132, and the preferred 3% to 132%, both record high levels, on buying influenced by the belief that regardless of whether the Nickel Plate merger went through, the stockholders were enti-tled to substantially higher payments on the basis of current earnings.

Heavy accumulation of the oils rected in crude prices in California, e largest producing state in the

Atlantic Refining and California Petroleum, each advanced about 3 points, and a number of others sold 1 to 2½ points higher.

General Electric scored an extreme

gain of 51/2 points, and Commercial Solvents A and B, Air Reduction, American Ice, and United Fruit were among the dozen or so issues to sell 3 to 5 points higher.

sell 3 to 5 points higher.

Weakness cropped up in the National Cloak and Suit issues, the common dropping Six points to 30 and the preferred 634 to 80, and in American

With the exception of the Scandinavian currencies, foreign exchange rates were easier, with sterling open-ing at \$4.83%. Bond prices maintained a firm tone

in today's trading, with the railroad m today's trading, with the railroad group supplying the major part of the activity. New York Central-Lake Shore 3½s led the upturn with a 3-point advance, and substantial gains were registered by Chesapeake & Ohio convertible 5s, "Katy" adjustment 5s, Chicago & Alton 3½s, St. Louis-South-western 5s and Delaware & Hudson is-

Oil company liens also joined in a fresh demonstration of strength in response to advancing crude prices and reports of new merger develop-ments. Skelly Oil 6½s ran up 2½ points, and Sinclair 6s about a point. Trading in the Foreign division was featured by an increased demand for French Government bonds following the announcement that discussions for a refunding of the French debt had been reopened at Washington. Liberty bonds were irregular.

DIVIDENDS

American Typefounders declared the regular quarterly dividends of 2 per cent on the common and 1% per cent on the preferred, both payable April 15 to stock of record April 5.

Miller Rubber declared the regular quarterly dividend of 50 cents a share on the common, payable April 25 to stock of record April 5.

Washburn Wire Company declared the regular quarterly dividend of 1½ per cent and an extra of ½ of 1 per cent, payable March 31 to stock of record March 20. This is the same as paid three months ago.

Dome Mines declared the regular quarterly dividend of 50 cents, payable April 20 to stock of record March 31.

Hood Rubber Company declared the regular quarterly dividend of \$1 a share, payable March 31 to stockholders of record March 19.

W. L. Douglas Shoe Company declared the regular quarterly dividend of 1½ per cent on the preferred stock, payable April 1 to stock of record March 15.

Air Reduction Company declared the regular quarterly dividend, payable April 15 to stock of record March 31.

Independent Pneumatic Tool declared the regular quarterly \$1 dividend, payable April 1 to stock of record March 20.

Atlas Plywood Corporation declared the regular quarterly \$1 dividend, payable April 1 to stock of record March 20.

Atlas Plywood Corporation declared the regular quarterly dividend of \$1, payable April 15 to stock of record April 1.

INDEPENDENT OILS

WHEAT PRICES HAVE DECIDED ADVANCE

CHICAGO, March 11 (A)-Fresh up turns here in wheat prices today re-sulted from higher quotations at Liverpool and from further buying by houses with eastern connections. Poor grading of Argentine shipments was a bullish factor, and with offer-ings here light the advance was easily attained. On the upturn May went to about 7c a bushel above yester-day's botton figures.

The opening, % to 2c higher, May (new) \$1.61@1.61%, and July \$1.39%

@1.40¼, was followed by a decided further gain. Selling from yesterday's buyers

made the corn market easy. Better weather also was a bearish influence. After opening unchanged to ½c up. May 78%@78%c, corn sagged all around to below yesterday's finish.
Oats were firmer, sympathizing with
wheat. The opening was unchanged
to 'se net higher, May 39 % @40c, and the market held near to the initial

notwithstanding lower quotations or

Corporation shows net of \$587,092 and accrued earnings in companies in which it has holdings of \$551,327, making tota net and accrued earnings \$1,138,419 After dividends of \$304,021 on debenturand preferred stocks, net value of assets in excess of liabilities, increased \$834,398 or more than 66 2-3 per cent of commor outstanding.

EMPLOYEES BUYING STOCK NEW YORK, March 11—E. G. Grace, president of Bethlehem Steel Corporation, announced vesterday that under this year's savings and stock ownership plan, 38,473 employees have applied for a total of 76,536 shares of 7 per cent preferred stock of the corporation at \$101 per share. \$101 per share.

NEW ENGLAND TRANSPORTATION

New England Transportation Company, motorbus subsidiary of the New Haven Railroad, has increased its capital from \$1,000,000 to \$1,500,000, by authorizing 5000 additional shares, none of which will be issued at present. The entire previous authorized capital of 10,000 shares is now outstanding. JORDAN ADVANCES PRICES

NEW YORK, March 11—Jordan Motor Car Company has advanced prices \$100 to \$150, with four-passenger roadster listed at \$1845, compared with \$1695; four-passenger Victoria \$1945, compared with \$1845, and five-passenger sedan \$1945, compared with \$1845. LONDON, March 11—Board of Trade figures show British February foreign trade as follows: Imports, \$96,845,000, compared with £117,689,000 in January; exports, £62,814,000, compared with £60,380,000, and re-exports £13,221,000, compared with £11,742,000 in January.

Standard Oil of Kansas net profit of \$494,296 after depreciation and after taxes for 1925 is equal to \$1.54 a share (par \$25) on \$8,000,000 stock.

Associated Gas and Electric System

Founded in 1852

Consumer Confidence

Customer ownership means not only an opportunity to invest; it indicates also the confidence which the customers have in the company that serves them.

Customer ownership among public utilities began about 1914, but it did not develop actively until after the World War. In 1919 there were 45,000 customer owners in the electric light and power industry as a whole; at the end of 1925 there were approximately 1,307,000-a twenty-nine

The customer investors in the Associated System during the same period increased from some 600 to approximately 21,000-a thirty-six fold increase, reaching a ratio of 1 investor to every 13 customers.

The management of the Associated System prizes the confidence which the consumers-those who know the company and its daily business methods-have in it, and realizes its obligation in maintaining a sound, growing business.

We invite inquiry regarding opportunities for expanding your business by locating in territories served by properties of the

STRUCTURAL STEEL DEMAND

NEW YORK, March 11 (29)—Orders for structural steel in the last week reached the highest level of the year—63,000 tons, of this total, American Bridge Company received contracts for 20,000 tons for the Union Terminal Building at Cleveland, 2900 tons for the Roanoke Building, Chicago, and 3000 tons for the University of Chicago Stadium.

EXPANSION IN BUSINESS OF CANADA STEADY

Employment Gains-Foreign Trade Increases-Many **Expansion Plans**

OTTAWA, March 11 (Special)—The are namerous evidences in Canada of reviving industrial activity. A general improvement in the employment situation, a marked increase in foreign trade and a more encouraging outlook for business generally have been reported.

improvement in the employment situation of the state of t

Heavy American Financing
Very large sums of money have recently come into Canada from the United States for the exploitation of Canadian natural resources. In the Province of Quebec the enormous development on the Saguenay River financed largely by the late James B Duke and his associates, is an example of this line of development.

The purchase by the International Paper Company of the extensive assets of the Riordon Company and the investment of large sums in coppergold properties in northern Quebec show that United States financiers are being attracted by the latent wealth of the country.

In northern Manitoba large sums lately have been invested by American capitalists in copper and zinc properties, while one of the largest United States rubber companies, the Goodrich Company of Akron, O., has recently acquired control of a big plant in Kitchener, Ont. The Manitoba Pulp

restment of large sums in coppergold properties in northern Quebec
show that United States financiers are
being attracted by the latent wealth
of the country.

In northern Manitoba large sums
lately have been invested by American capitalists in copper and zinc
properties, while one of the largest
United States rubber companies, the
Goodrich Company of Akron, O., has
recently acquired control of a big plant
in Kitchener, Ont. The Manitoba Pulp
& Paper Company, financed by United
States capital, has let contracts for
the construction of an entirely new
town at Fort Alexander, Man.

A recent summary made by The
London Times estimates United States
investments in Canada to have reached
\$400,000,000.

GOVERNMENT ISSUE SOLD
WASHINGTON, March 11 (A)—The
latest Government bond issue, offering
\$500,000,000 at 3% per cent, has been
fully subscribed. It was put out three
days ago at a premium of 1 per cent
above par. It is expected the books will
be closed soon. The interest rate on the
bonds, which will mature in 30 years, is
the lowest proposed by the Treasury
since pre-war days.— PHILAUFLPHIA ELECTRIC CO.
The Philadelphia Electric Company is offering stockholders an opportunity to subscribe to \$12,570,000 8 per cent cumulative preferred stock of the Philadelphia Electric Power Company at par of \$25 a share. Ten per cent of the purchase price must be paid by April 15, and the balance in installments of not less than 10 per cent.

GOVERNMENT ISSUE SOLD

CHICAGO STEEL DEMAND GROWS

CHICAGO, March 11 (Special)stacks on the active list.

appear more firmly settled at 2.10 cents, Chicago. The leading independent has opened second-quarter books at 2.10 cents.

As Pittsburgh district steel makers stiffen their prices at Pittsbrugh, they

narrow the freight differential that has permitted them to compete in Chicago territory, and being unwilling to absorb additional freight charges. are less active in seeking business here. With Illinois Steel Company ery than prices.

Sheet mills are operating at capacity

sneet mills are operating at capacity, but specifications come in slowly, and schedules are on a weekly basis. Bolt and nut specifications have dropped off as a result of heavy February buying, enabling mills to catch up.

on seasonal lines like poultry net-ting, wire mills are behnid.

Sales of northern pig iron show slight improvement, but most melters are hesitant to cover their second quarter needs. March shipments are averaging better than February ones. Efforts to break through \$23, Chicago furnace, have failed and this level is technically stronger. Iron and steel scrap continues

SALES OF PACKER

Quality Poor, Prices Easier-Buyers Await Better Kind

About the only pronounced feature in the packer hide market during the first week of the current month was

asked restricted operations until the last of the week, when the packers yielded to the situation. Spready native steers, of 1925 take-off, were cleaned up at 15½c. The position of the pack-68 ers, though strong on account of low 1054 supplies, has an element of weakness because of the fact that a better quality is near enough to make buyers cau-tious in committing themselves beyond immediate needs.

The decrease of 255,917 tons in the United States Steel's unfilled orders in February reflects besitation in forward buying. But actual consumption of steel, shown by specifications, was large, being reflected in an average rate of operations for the month at between 88 per cent and 89 per cent capacity, compared with 87 per cent in January and 84 per cent in January an

Production Is Stepped Up to 92 Per Cent of Capacity

Heavy finished steel has come back, following the February lull, at a rate that may exceed the tonnage record of last March. Additional capacity put on brings the ingot rate here up to 92, and places 29 out of 35 steel works, and 8 out of 10 merchant iron stockers by the continuous trackers on the active less than the continuous trackers.

One hundred thousand tons of car steel, plus 42,000 axles have been or will be placed in a few days. This represents requirements for most of the cars placed this quarter. Carriers are pressing for their ears, and cer-builders are specifying heavily and caking early hipment.

Railroad track fastening placement have been big, including 20,000 keg of spilter and bolts, 8000 tons of angle bars, and 2500 tons of the plates. Con-siderable railroad bridge work is coming out. Structural steel awards have been the heaviest in six months. The

Second quarter finished steel prices

here. With Illinois Steel Compan and Inland Steel Company operatin at close to capacity, consumers an expressing more concern over deliv

scrap is being bought by dealers at \$14 to \$14.10, and by melters at \$14.25.

HIDES RESTRICTED

the movement to force the price list up a fraction based on the low sup-plies. But the poor quality now being offered curtailed new business and sales aggregated less than 40,000 hides. Some of the regular tanners were in the market for fair quantities of branded hides, but the slight advances

There seems to be an underlying demand for hides at a price, but buyers absolutely refuse to pay an advance on the sort which usually clogs the market at the approaching end of the winter season. The Frigorifico hide market is steady-to firm, but buyers are holding to their bids with more or less indifference as to the outcome.

less indifference as to the outcome.
Packer kips and calf skins are dull and easy. About 20,000 calf skins were sold at 20½c, but later in the week a fair sized lot was booked at 20c. Chicago city calf sold the first part of the week at 18c, but later several car load lots were moved at 17c with more obtainable at the same figures.

January and February packer kips, free of brands, are quoted at 15½c. The branded sort is offered at 13c. City kip is dull; nominal quotations 14½c.

of steel, morning and the percent in January and \$4 per cent in January and 20 per cent of steel made, compared with a normal taking of around 30 per cent. This year, it is estimated, the roads will take from 40 per cent to 45 per cent of the production of the country.

Roads in recent weeks placed heavier orders for cars and engines than for some time. Most rail orders for the year have been placed, but buying of track accessories, spikes and ties is excellent.

1901 and the 1916 breaks were not.

"Our analyses show the striking parallel of the present stock market of situation with 1901 and 1916, on which basis we are confident in saying that business will suffer only a normal reaction, which was be expected in any event after many months of greater than usual activity."

FRAU NEPPACH BARRED

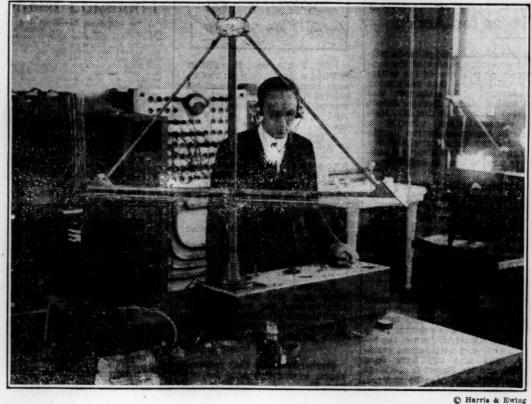

BERLIN, March 11 (P)—The Great many months of greater than usual activity."

BERLIN, March 11 (P)—The German Tennis Federation today barred Frau Neppach, woman champion of Germany, from all participation in German tennis tournaments until further notice. This penalty was assessed because she had disregarded the federation's orders forbidding her to enter competition on the Riviera. Frau Neppach recently returned from the Riviera, where she was defeated decisively by Miss Helen N. Wills, the United States champion.

RADIO SEEN AS GREAT AID TO EDUCATION

Kansas City School Head Tells of Possibilities of Air Instruction

WASHINGTON, March 10 - To give everyone in the United States a high school education is the part radio is destined to play in twentieth century schooling, according to Ira Insco Cammack, superintendent of schools of Kansas City, Mo., speaking while here for the convention of the National Education Association's largest departmentthe department of superintendence.

"Radio will make United States citizens the best educated people of all time," Superintendent Cammack predicted, "in two ways-first, by conveying instruction to adults who were compelled to leave school prematurely and, second, by making methods of teaching children more modern.

"Boys in Kansas City whistle grand opera music more than jazz music. Why? Because radio has made their musical education much more than weekly hour of singing 'do-re-mefa' and so on up the scale. Teachers tell them to tune in every Sunday evening and hear the greatest artists singing and playing in the A. Atwater Kent concerts. They do this. As a result, Kansas City schools, where Marion Talley was discovered, hope soon to produce a second artist

equally as great. "To teach the civics lesson on 'How the President of the United States Is Inaugurated,' we last year assembled the children in their school auditoriums, where, from radio loud speakers installed there, they actually heard Chief Justice Taft administer the oath of office to President Coolidge and the President's inaugural address. Thus radio improves the old method of simply making children memorize the oath of office

from a book." Radiocasting of agricultural and me economics information makes educators realize that this would not be necessary had these facts been learned in school and prods them to teach this practical knowledge thoroughly in classrooms, Superintendent Cammack added.

well, Mr. Cammack said. Mexico's Government has launched a movement to give all its citizens by radio the equivalent of a grammar school education, and educators of the United States, through radiocasting stations at many universities and in co-operation with general radio stations, will carry this move at least one step higher, Randall J. Condon, newly elected president of the N. E. A.'s department of superintendence, agreed with Superintendent Cam-

Long Senate Debate Likely Over War Debt Settlements

Majority Leaders Seek Delay, While Mr. Smoot and Secretary Mellon Press for Action

Special from Monitor Bureau will have charge of the Administration's effort to obtain ratification from the Senate of the Italian and other foreign war debt settlements, expresses absolute confidence that Senate approval will be secured in the near future.

This conviction by Senator Smoot is in sharp contrast to the information and attitude of other Administration leaders in the Senate. It is Senator from Kansas, Administration floor leader, polled the Senate re- stated that he anticipated a lengthy cently on the question of ratification | contest. The debate, he said, might of the Italian debt arrangement and run into several weeks duration. that his count showed 51 senators opposed to its being brought to a abundance of time. vote this session.

In other words, the majority of the tors don't want to vote for the Italian agreement and yet hesitate to reject

Plan to Delay Action

Another plan proposed, to send the debt settlement to the Foreign Relations Committee for investigation. has apparently been abandoned as too ent a gesture of delay.

When Mr. Curtis informed Administration leaders of the result of his count there was an immediate demand that the issue be permitted to go over. Mr. Smoot and Andrew W. Mellon, Secretary of the Treasury, it is understood, were opposed to such a policy. They refused to share the misgivings of most of the leaders and insisted that the question be brought to the loor of the Senate and a vote taken. portance of approval.

This was done. Mr. Mellon in a let(R.), Senator from Pennsylvania.

ter to President Coolidge, made pub-WASHINGTON, March 11 -Reed lic in the press, enumerated the con-Smoot (R.), Senator from Utah, chairman of the Senate Finance ment. He insisted that ratification Committee and member of the American Debt Funding Commission, who lon's communication wrought up at once.

Anticipates Long Contest

Mr. Smoot announced that he was learned that Charles Curtis (R.), tlements be made a special order of

Approval of the debt settlements was the last of the "big three" legis-Senate wished the matter to be laid lative projects that the Administraover. This could be done by return- tion demanded of this session, These ing it to the finance committee, os- were, World Court adherence, tax retensibly to unearth additional infor- duction and debt settlements ratifimation. There are 34 senators who action. The first two have been are up for re-election, 27 of whom achieved, and Mr. Smoot is confident are Republicans. Most of these sena- that the third will also be secured. Mr. Smoot, in expressing his belief that he could secure the Senate's approval to the ratification project declared that he has received from 10 to 18 Democratic votes. If he on this question, the added Democra-

tic votes will insure approval. It is

upon this estimate that the Utah

Senate would ratify the settlements. The contest in the Senate will be on the Italian agreement. If it passes muster the others will be accorded approval as a matter of course. The important fact about Mr. Smoot's attitude is that he, the chairman of the important Finance Committe, is for early action on the issue. Senais understood that Mr. Smoot tor Smoot is a veteran member of ed to confer with Republican the Senate, and he would not be exand Democratic leaders in Congress pected to ask for consideration of a an effort to apply all possible pres- question unless satisfied that it had mre for support of the ratification a fair chance for victory. Hamburg Buys Ships

In a copyrighted story from Berlin, as New York Herald-Tribune states and Glasgow. that the three United American shins —the Reliance, Resolute and Cleve-land—have been sold to the Ham-burg-American Line for a price above

This is in line with the Hamburg's policy of expansion to compete with the North German Lloyd and the sale of the three ships will increase its tonnage by 57,000 tons. The price reported is cheap, the Resolute and Reliance being large ships and rank-ing with many of the best liners.

The Hamburg company, it has been known for a long time, seeks to re-establish its prestige in the United States by operating its own services For the last five years it has main-tained a joint service with the United American, the latter representing it

in this country.
With three of its best ships gone the United American Line will be vir-tually out of the transatlantic pas-senger business but will retain its intercoastal services. The Hamburg company in addition to its New York-Hamburg route has lines from Ham-burg to both coasts of South America, to Africa and other ports of the

Freighter Carries Mails

Parcel post matter will hereafter e carried by the Black Diamond e, a freight company, between New York, Rotterdam and Antwerp. York, Rotterdam and Antwerp. The company manages a fleet of Shipping. Board ships in the transatlantic route. The policy of giving the parcel post to this line is in keeping with the plans of the present Administration to procurage American ships.

It was recently noted that the American Merchant Lines are carry-

ing first-class mails, these freighters flying the American flag competing actively with the fast passenger ships. One of its vessels, the American Trader, recently established a record for freight ships of 8 days 11 hours between New York and Plymouth.

EDITORIALS

Most people are accustomed to think that the great problem in South Africa is still the race

The Color Problem in South Africa

problem between Briton and Boer. They remember the war of 1899, the rebellion of 1914, and the violent utterances of the extremer Nationalists in more recent years. But the removal

of the flag issue by the peace of 1902, the successful accomplishment of the Union in 1909, and the assumption of responsibility for the government of the country by the Nationalist Party in 1924, have gradually brought about a relaxation of the tension between the two white races. The racial issue, now that the two races and the two languages have equal rights, is steadily ceasing to be the main issue in South African public life and is being replaced by another.

The new issue is the color issue. The color question has always complicated South African life, but today it is assuming new and much more difficult forms. The population of the Union, according to the census of 1921, consisted of about 1,500,000 whites, 4,700,000 Bantu Africans, and 165,000 Asiatics. Moreover; to the north of the Union lies tropical central Africa with a large variety of Negro peoples. Before the war the native population of the Union had hardly emerged at all from its primitive tribalism, and though the Indians under Mahatma Gandhi's leadership had proved themselves capable of exerting considerable political influence by means of strikes and agitation, the native peoples were hardly organized at all.

But today it is quite different. While the overwhelming mass of the native population still lives in its old conditions, contact with the white man in the towns and the mines, the spread of education and of the ideas of selfdetermination popularized by the war, and the growth in wealth have produced a class-consciousness among the Africans which is increasing every year. They are no longer willing to accept the status of practically disfranchised hewers of wood and drawers of water for the white man in perpetuity. And in this attitude they are actively encouraged by the politically more advanced Indians, who are also in revolt against the restrictions placed upon their freedom of movement and domicile by the white

All this stirring among the Africans and the Asiatics has produced a corresponding activity of thought among the white population. Opinion, however, is deeply divided. On the one hand is the Cape Colony tradition which sought to erect no legal distinctions between black and white and which gave to the native the franchise under certain restrictions. On the other side there is the northern tradition which, according to the old Dutch law, declares that there shall be no equality between white and black in church or state. Then white labor is increasingly trying to protect itself against the competition from the native peoples living at a much lower standard, which tends to drive them to the poor white level, by prohibiting the use of colored labor in certain occupations. Another school advocates the segregation of the two races in different areas in which each can grow and develop in its own way.

But whatever way public opinion may shift and change in its demands on either side, there are certain facts which cannot be gainsaid. The first is that the African has as great a capacity for development as any other section of the human race. There may be people elsewhere who doubt this, but no one who has examined the progress made by the African race in America, whether of pure or mixed blood, can hesitate to recognize that the native of South Africa is destined steadily to progress out of his ignorance and barbarism, and eventually to take his place among the civilized peoples of the world. The second fact is that the Negro race in Africa today as a whole is nowhere near the level in knowledge, or experience, or selfcontrol of the white. His growth to equality can only be gradual.

But there is a third fact that governs both the others, and that is that the various races have somehow to learn to live together in justice, harmony, and peace. All experience shows that, while segregation may be possible for a time and in limited areas, it never lasts. Political, economic, and cultural forces are too strong. Sooner or later they break down all artificial barriers, for the children of men are at bottom one family, and nothing can keep them permanently apart. It is just this fact that makes the task which South Africa has in front of it so interesting. It is being compelled to grapple on a small scale with the problem of interracial and inter-color contact which modern invention is forcing in increasing degree on the consideration of the whole world. And if both sides apply to the problem the eternal qualities of justice, tolerance, and common sense, South Africa will not only find the way out for herself, but will point the way for the rest of mankind.

Not by design, but by coincidence, publicity was given, a day or two ago, to two strangely

divergent views of jour-Two Views of Journalism

nalism, or of the modern exponent of journalism, the daily newspaper. In his first address at the National University of Mexico, Walter Williams, dean of the Missouri School of Journal-

ism, who has been invited to deliver a course of lectures in Mexico City, undertook to trace the development of the newspaper and to estimate its position today as a constructive and potent force in the inculcation and defense of democratic ideals. He defined four distinct stages through which American journalism has passed, and a fifth, which marks its present status, as he believes. He finds that in this new era the press has been "converted into an institution of broad and generous calling."

Tracing this growth and development through what he defines as the four earlier

stages, Dean Williams discovers that during the last thirty years some distinctly radical changes have taken place. "Journalism reading," he says, "is no longer the privilege of the few. All read the papers because they are within the reach of all fortunes, and because they furnish information that interests all social groups. Politics, in the old sense of the journalistic word, no longer monopolizes the space, but all the rest of human activities-industry, art, sport, commerce, literature—go along, side by side." He continues:

This universality of information has profoundly modified the character of the journals, converting them into concretions of public opinion and into elements which form and modify it. By opening its doors to the majorities it has become a strong lever of democracy, of those states of things which permit all men the maximum of vital expression of which they are capable. In spite of the obstacles and limitations to which the press is subjected, it is the promotive element of good democracy. ... The press, as representative of public opinion, is the greatest opposition that can be presented to the governments that found their power on arms.

Newspapers published in the United States on the day following the publication of the foregoing address quoted President Calles of Mexico as denouncing the Mexican press because of the attitude of some of the newspapers there in opposing his recently declared administrative policies. He is said to have declared that the effort of the newspapers in his own country "is to provoke a foreign tempest so that certain foreign organizations will take direct action in our affairs." He declared his conviction that though the press claimed to be the molder of public opinion, the true opinion of the country is expressed by the representatives of the Labor organizations, a convention of which he was at the time addressing.

Without a knowledge of all the facts in the case no cautious or considerate onlooker would attempt either to defend or refute the correctness of President Calles' position in denouncing, as unpatriotic, the attitude of the newspapers which he none too clearly specifies. One of these he names, it is true, but his indictment is against the press as a whole, and in taking this position he opens the door to possible criticism. If the press, as an institution, fulfills the estimate of Dean Williams as being "the promotive element of good democracy," then he has been oversanguine and perhaps too generous in according to the representatives of organized labor in Mexico all the virtues which he claims the press does not

Democracy, if it is to become the controlling and leavening influence in a nation, must be the expression of more than a faction or class. Is it too much to say that if the spirit of democracy is not reflected in the press of a nation it remains unexpressed, simply because it does not exist in a large or predominating degree? Failing to discover what he realizes as this expression, it may be wise even for the closest student and critic to make sure that he has not failed to estimate aright that which is

Conditions of lawlessness and social disorder prevailing along the southwestern border of the

Reform on the Mexican Border

United States continue to engage the attention of Americans in that neighborhood. Notorious as are the evils of such a resort as Tia Juana, on the Mexican side of the border near San Diego, Calif., the method of

abating them is not readily apparent. The authority of the United States does not cross the international line, though, if there should be a repetition of the crime which has caused the present discussion, its influence might well do so. But it is obvious that one nation cannot enforce its moral standards on another. In a small and most sordid and vulgar way the Mexican territory of Baja is doing what the Principality of Monaco is doing in Europe, and is therefore inviting the visits of lawbreakers of all sorts from every part of the United States.

It is just as well to contemplate this situation in a proper spirit of national humility, Mexico offers the soil, the legal protection and most of the attachés of the gambling and liquor "joints" of Tia Juana. But it is asserted that Americans supply the capital, the direction and most of the patrons. Whether the Mexican officials or the American operators have done the more to corrupt public morals is questionable. It is certain that for years public exposure of these evils has been deprecated by "business interests" in San Diego, and today radical reform is blocked by the influence of American citizens who find profit in the continuance of existing conditions.

Any intelligent effort to remedy these conditions, therefore, should be wholly free from recrimination. Mexico should not be approached as a moral leper, nor, unhappily, can the United States take on the attitude of offended virtue. Indeed, while the influence of the northern nation may properly be exercised for the correction of the morals of its neighbor, its authority ought first to be vigorously employed for the discipline of its own citizens who

think to profit by Mexico's slacker code. Stricter control of passage of the gates between San Diego and Tia Juana is the one remedy generally urged. It is not so simple as it sounds. Some advise that the gates be closed absolutely and all passage prohibited until the Mexican town is starved out. But besides being of doubtful legality, this expedient would inflict almost as much injury on legitimate American interests as upon the illegitimate ones of Mexico. It would check the operation of the Imperial Irrigation District, would block orderly railroad operation, and would shut off legitimate trade on

both sides of the border. Closing the gates at sundown is more practicable, but might lead to hurtful retaliatory measures on the Mexican side. A more ambitious suggestion is the creation of a sort of "twilight zone," extending for fifty miles into Mexican territory within which the police regulations shall be identical with those in the United States. But there seems to be no good argument with which to support such an effort to dictate Mexican policy.

Possibly the simple device of demanding passports at the border might prove effective. To those having daily business on one side or the other of the line, getting a passport good for two years would involve little trouble or expense. To the individual going into Mexico for a day's "spree." it might act as a deterrent.

That there is need for immediate action in bringing about better conditions has been brought out in the volume of sordid evidence which investigation of border conditions has produced. When it is said that all the evils of the saloon at its worst in the United States exist in concentrated form in Calexico and Tia Juana, it can be understood that their effects cannot be limited to any definite area, but must rankle and spread on both sides of the border until completely eliminated by strict border regulation. There are thousands of families in southern California that can testify to the moral degradation, the loss of lifelong savings and similar deprivations which have come to them because of the border contagion which has touched a single member. And more than one San Diego business man knows that the sole reason why many a family, moving to California, has decided not to make that city its home has been because of the proximity to conditions existing in Tia Juana. It is high time that preventive action is taken, especially when an effective remedy is so ready at hand.

To those who really know the game of American college football and the part that its finan-

Putting the

Stamp of

Approval

on Football

cial returns have played in the development and maintenance of other college athletics, the recent action of the athletic committees of Harvard, Yale and Princeton in raising the general price of the tickets to

the games played between the so-called "Big Three" does not come as any great surprise. To them it simply means that the committees of those three universities are putting their stamp of approval on the game as a worth-while intercollegiate sport and a means of raising the revenue necessary to the maintaining of "athletics for all." In fact, the report which they gave out would seem to indicate they believe that football must be continued as an intercollegiate sport if athletics are to continue as an important part of a college education.

It is less than three months since there was considerable discussion regarding the game of football and its overemphasis in the schools and colleges of the United States. What should be done to put the game under proper control was discussed pro and con, and a number of plans were forthcoming. It seemed to be the opinion of many members of the faculties of the various institutions of learning that the game had broken away from the college authorities and become far too important a part of the curriculum. At one time it looked as, if drastic measures would be taken by more than one college regarding its 1926 schedule.

While all this agitation was going on, those who really knew how much football had been doing in the various colleges to maintain athletics for all and help make up financial deficits accrued by nonvaying sports, such as crew, track, tennis, golf, etc., were satisfied in the thought that, while the agitation would undoubtedly do considerable good, it would not seriously affect the great fall snort from the viewpoint either of the player or the spectator. They knew the greatness of the snort and that its worth was important enough to withstand any attack that might be waged on it by those who did not appreciate its true value. That its value would receive such recognition so soon after it had been adversely criticized was not expected, even by its most enthusiastic supporters.

With the athletic committees of these big three eastern universities putting their stamp of approval on football as they have in their statement regarding the increase in the price of tickets, it is safe to believe that the game will continue to be the great fall sport.

Editorial Notes

Radio enthusiasts will be interested to learn of a wireless freak recently recorded in England. It appears that a number of individuals who had spent the night in listening for signals from distant places were suddenly astonished to hear toward dawn a program of music accompanied by announcements in a strange tongue. The music is reported to have come through with remarkable clarity and strength, and the speech, though not recognizable by any of the listeners, was perfectly distinct. The station was afterward identified with certainty as 1PP, which is situated in Japan. This station is a very ordinary one, and the question remains unanswered, How was it that on this particular occasion transmission from the Far East came in with such amazing strength? The almost complete failure, so far as the United States was concerned, of the recent radio week, when everything was done to make the experiment of transatlantic transmission a success, stands out in interesting contrast to this reception. After all, it would really seem that we have plenty more to learn about radiocasting yet, though atmospheric conditions probably had much to do with the foregoing experiences.

New York City is badly torn up over a proposition to give up a slice of Central Park to a great war memorial. Assaults on the park are recurrent in Manhattan, where any bit of land not weighted down with steel and stone is looked upon with covetous eyes. It is to be hoped that this raid will be repelled as so many others have been. Aside from the almost criminal folly of giving up any portion of the little bit of natural scenery still left to New Yorkers there might be a plausible argument against erecting any war memorial. Why commemorate that savage struggle at all? It will long be remembered, and for the moment high taxes, high prices and soaring rents should keep it fresh in the thoughts of the people. A dollar that buys scarcely sixty cents worth of necessaries may seem an ignoble war memorial, but it is at least an impressive one,

Dickens' London That Remains—An International Treasure

brated. The Dickens Fellowship, which has its head-quarters at Dickens House, 48 Doughty Street, held its annual dinner at the Criterion, under the chairmanship

of Pett Ridge, the famous novelist.

Far from waning, Dickens appreciators are increasing. Only last summer his old home in Doughty Street was secured as a permanent museum, and now the Dickens Library and Matz collection have been transferred there, plus translations of his works in Czech, French, German, Hungarian, Polish, Rumanian and Serbian, presented by the respective governments in the beginning of the year. The Dickens London that remains has become not only

national but an international asset!

We are continually reminded, by photographs, or articles, or even by a stroll through the Strand and West, End, of changing London. Some of the changes were, perhaps, long overdue, urgently necessary, but there are times when so perpetual an offering of "new lamps for old" gives us a lingering sense of regret.

Beneath the practical appreciation of modern facilities to meet the needs of modern life, most of us treasure a belief in the magic atmosphere of "old lamps." Did we not revel in the mysteries of Aladdin's cave many years ago, and "old lamps" today can still conjure for us delightful genii who open the door of memories.

The new lamps may be splendidly efficient, beautifully burnished, offering us a brighter, cleaner London-but we rub them in vain; the genii of old associations refuse to

And that perhaps is the reason our footsteps turn so readily toward Doughty Street.

No. 48 is just a gloomy old Georgian house in a quiet gray, old street off Grey's Inn. If one approaches it via Mecklenburg Square, the trees in spring look almost startlingly green against the dull background. The street has a slight air of "yesterday" about it. It seems passively resigned to the motor horns which it has exchanged for the old-time rattle of horses' hoofs.

+ + + The museum is like a number of kindred museums not highly spectacular; the room Dickens wrote in, his writing desk, his chair-the outlook that we, for a second, share through the window. A faint tang of mustiness, invariably associated with museums and librariesand then suddenly, perhaps, the genii will appear. . . .

There are the little Cratchitts; possibly our first Dickens friends, made even in nursery days, when passages were read to us of an evening, before a firelight which twinkled on the brass rail of a high fender. Perhaps David Copperfield himself will creep a little apprehensively round | despite its changes.

Another Dickens anniversary has recently been cele- | the door, with the wide eyes of Oliver Twist peering over

We have faded into a corner. Back they all troop, our old friends: Nicholas Nickelby, Peggotty, the optimistic Mr. Micawber, little Nell and her old grandfather, Mr. Scrooge, and a dozen more; Mr. Pickwick himself, with close on his heels the excellent Mr. Wardle, Messrs. Snodgrass, Winkle and Tupman, with Sam Weller in their wake, and on the outskirts of the group, fluttering in true Dickensian style, a number of voung ladies, not forgetting the young lady with the fur-topped boots, nor the plump sister with the lace tucker."

How gladly would we linger with them, till we are suddenly and pleasantly reminded that even on our road back to Fleet Street we can keep some of the delightful company with us.

Slipping through side streets, across Holborn and the tranquil square of Lincoln's Inn, it is not more than a stone's throw out of the way to pass a low, corner shop, sheltering among high buildings like a frightened girl in And here, perhaps, little Nell and her grandfather will take leave of us, for this is the old Curiosity Shop; one more "old lamp" preserved among the new.

But we pull out our watch, which reminds us that it is getting near lunch time. Why hurry forth into the endess stream of traffic? The genii seem benignly disposed to stay with us just a little longer. True, we must cross Farringdon Street, and work our way round St. Paul's, but almost entirely by old lanes and narrow byways we can reach Lombard Street and Change Alley. There an "old lamp" will positively wink at us in merry invitation from Mr. Pickwick himself, for this is no less an inn than

the George and Vulture. How hospitable a welcome he will afford us! We slide into the time-polished wooden bench. With what warmth we can revive memories of the good old days, Dingley Dell, the coach rides—the merry friendliness of it all.

And then a queer little silence falls for an instant. "Good old days!" we repeat, suddenly conscious of our neighbor, in 1926 attire, and of the waiter at our elbow! And very faintly in the distance we seem to hear Mr. Pickwick's voice murmuring, "Good old days-yes-but not all good; there was Fleet prison, you know . . . in Newgate. Ah! That was too terrible!"

We are brought back to earth-even to the ordering of our lunch. Fleet prison! Yes, that was a hideous lamp" that Dickens himself extinguished for all time, by Pickwick Papers! What an achievement in social reform! What a book! Perhaps there are a few, a very few, "old lamps" that are always new! London is still London,

The World's Great Capitals: The Week in Rome

There are many who believe that there is some connection between the two statements made recently by the Italian Prime Minister that "1926 is going to be the Napoleonic year of Fascism," and that "Fascist Italy can, if necessary, carry the Tricolor beyond the Brenner, but lower it she never shall." While the latter declaration was made at a moment when relations between Germany and Italy were much strained on account of the dispute over the German-speaking population in Southern Tyrol, the former sentence appeared in the Fascist magazine, Gerarchia, in a short article written by Signor Mussolini and entitled "Viaticum for 1926." In this article, after reviewing the progress made during the past six years by this magazine, which is a monthly publication of Mussolini's own organ, Il Popolo d'Italia, the Duce says:

Fascism must not admit heterodoxy. This is its peculiar character, the fundamental reason of its existence, as well as of all ideas newly formed which strive to dominate the as of all ideas newly formed which strive to dominate the world. Fascism has won because it has never tolerated any difference of opinion; its block is monolithic. Fascism wins and will win so long as it preserves this austere sense of unity, this religious obedience and this æsthetic discipline. Faith, then, is necessary; not relative but absolute faith; faith in Fascism which is at work in strengthening the outward face of Italy and the moral features of the Italians; faith in the Fascist Revolution which will have in 1926 its Napoleonic year, also because the new penal, commercial and maritime codes will come into force; faith in the Italian Nation, who is just beginning to have a matein the Italian Nation, who is just beginning to have a material and moral place in the world, which it is capable of enlarging in proportion to its growth and growing power. + + +

A serious effort to enforce forestal legislation in Italy is now being attempted, although it is doubtful whether much good can now be done, since the work of devastation has been left undisturbed until a comparatively recent time. Few countries enjoy such a variety of trees as Italy, for together with the birch and pines of northern Europe, we find the olive, fig, manna-ash and palm of more southern latitudes. Luigi Luzzatti, the former Premier, has now written a decalogue for the lover of trees, which has been given a wide publicity. It reads in part:

Thou shalt love, and preserve against all damage, the tree and the forest.

Thou shalt recall that deforestation, a sign of ignorance, Thou shalt teach to the mountaineer that love for his

Thou shalt teach to the mountaineer that love for his native home does not permit the destruction of trees.

Thou shalt labor in such way that every year it will be possible to plant in the ground a certain number of saplings, in celebration of Arbor Day.

Thou shalt improve, but not to the detriment of the forests, the marshes and pastures of the mountains.

Thou shalt recognize that pastures, though useful, are harmful to the mountains if ill used.

Thou shalt concernic with forestry expects in preaching.

Thou shalt co-operate with forestry experts in preaching the creed of the tree, and thou shalt instruct those who should observe the laws of the homeland, which is the guardian of the forest and of the mountain.

+ + + The Palazzo Giustiniani, situated near the university, will house the International Institute for the Unification of Private Law, created about a year ago, under the jurisdiction of the League of Nations. The Italian Government has subscribed the sum of 1,000,000 lire a year for the upkeep of the institute, and its formal opening is expected to take place during the current year. The Palazzo Giustiniani, which does not rank among the beautiful buildings of Rome, has the advantage of being situated in the very heart of the old city. For many years its first floor was the headquarters of the Italian Freemasonry (now dissolved), while its upper floor was at one time occupied by the Prussian Historical Institute.

A set of new Italian stamps, five in number, has just been issued by the Italian Government, in commemoration of the seventh centenary of St. Francis of Assisi The lowest value of the spries is olive-green in color, and represents the Vision of Jerusalem on a design by Duilio Cambellotti; the forty centimes stamp, in deep violet, shows a picture of the church and convent of S. Damiano near Assisi, by Francesco Biasi, one of the foremost Italian etchers. The two highest values, in azure and in burnt sienna tints, respectively, are the work of the chief engraver of the Italian Mint, and show a scene of the life and an effigy of the saint. As usual when commemorative stamps are issued, this series has almost disappeared from circulation.

A monument to Cesare Battisti, the Italian irredentist hero, will be erected at Botzen (whose Italian name is Bolzano) on the same pedestal which was prepared by Austria during the war for a monument intended to commemorate the victory of the central empires. Battisti, who was born in the Italian Province of Trent, belonging to Austria, and was therefore an Austrian subject, joined the Italian Army as a volunteer in the early days of the war, but was captured and executed by the Austrians as

Signor Mussolini, in declaring that Italy had no intention of removing from its old site in Bolzano the statue of Walter von der Vogelweide, the poet of whom we hear in the intensely German opera, "Die Meistersinger,"

added that Italy would erect another monument which would be "sacred to the memory of all those martyrs who have written the last word on the nationality of the Upper Adige." The Premier's suggestion has won the hearty approval of all patriotic associations, and a national subscription was immediately opened.

The inauguration of the monument will take place on July 12, the tenth anniversary of Battisti's execution. Signor Mussolini was a great personal friend of Battisti, and in 1908, when he was still a Socialist, was a regular contributor to Battisti's paper, Il Popolo, published in Trent, until he was expelled from Austria as a dangerous revolutionist. He was the first to subscribe the five lire, the amount fixed per person.

Letters to the Editor

"New Zealand Literature Today"

To the Editor of THE CHRISTIAN SCIENCE MONITOR: The article entitled "New Zealand Literature Today," published in The Christian Science Monitor several months ago, has excited much interest among some of the authors mentioned, and all the more because we are as yet only

toilers in wild and waste regions of literary art, not sowers and reapers in long-cultured fields and gardens. Most of us must disagree with the main contention, that there is nothing new and distinctive in New Zealand life

and scenery worth writing about; that our country is more English than such parts of England as, e. g., the Isle of Man; and that consequently no Hall Caine will come from among us. The inference is that our authors, to be successful, should

henceforth make up their minds to describe only the general "British" aspects of life in this island Dominion, and that they should not dwell on what is characteristic. Only fiction is dealt with in the article, the new budding poetry being ignored, so only fiction need be discussed.

We must concede that for the last ten or fifteen years the primary and original characteristics of the Dominion have been superficially submerged by the extensive and continuous flood of migration, but below the surface they still continue and still direct the course of its career. One of them is a greater simplicity; another is an intensity of feeling and an abandon in the expression of it, and still another is an enthusiastic and believing idealism. That idealism lies at the root of New Zealand life. It gave us that movement among women which made them first among their sisters to attain to university honors, though it must be acknowledged that our novelists have not yet-apart from the Utopian group-done justice to it. There is another theme for novelists in the story of

New Zealand-one that surely, if rightly treated, could supply as much "color and pathos" as in the case of South Africa. I will not say "of India," because perhaps there is no country in the world quite the equal of India in regard to race themes and race problems. But here before their own eyes, the oldest generations have seen played the moving drama of a race struggling between the depths of savagery and the heights of twentieth century Christianity.

Then think of the remnant that has literally been saved, the great Maori leaders, who have toiled to save their What other people has in two or three generations evolved such capacities, such possibilities? Their origin is a mystery, a romance and a poem; their traditions, even while mixed with gross savagery, have fragments that

resemble the more primitive Greek mythology.

Or turn to that "background," that scenery, that nature, we are recommended to leave out—the strange, fantastic forest with its wonderful varieties of trees and ferns; the snows and glaciers of the Alps, the solitary dome of sno the fresh plains of Kussock, the "Inferno" of the whole volcanic area—all that tourists travel thousands of miles

Are we to ignore all this and describe only some "desirable suburban residence" with its tenants living in a dull house in a dull street of a dull town? No, let us have the fiord and the Alps, the cliff where the scarlet blossoming tree hangs over the blue waters of the bay. Are we only to describe the stock characters of current fiction, the puppets of love imbroglios or of police court cases? No, let us keep to the old whaling or trading "King," the faithful missionary, the founders of a new state, or those who inherit their spirit and their task. It is these who are worth setting before the world, not the

It may not pay so well; we must grant that. It might be safer for any New Zealand author who was bent solely on his or her own success to leave these islands in early youth and to lose all the gifts of their nativity among the throng of British authors. But we of the older generation faithful to our own little country and to its ideals.

Auckland, N. Z.
